Data Agent to Key Note and Present at Two Conferences in New York City

Berkeley, CA and Newton, MA, May 15, 2006 – Data Agent, LLC, an innovative company providing Investment Intelligence^(SM) solutions to hedge funds and investment management firms, today announced that Bob Leaper, CEO, will be presenting at two separate conferences in New York City on May 22, 2006.

Mr. Leaper will be providing the Key Note address at the Global Investment Operations Fixed Income Operations Conference held at Bayard's New York. The topic of the Key Note is "Facing the Challenges of Regulatory Pressure and Risk Management in the Fixed Income Markets". The topic leverages Mr. Leaper's 25 years of experience in investment systems and as a bond trader, and will set the stage for the sessions throughout the day.

Later that morning, Mr. Leaper will join a panel of experts at the Institutional Investor Enterprise Data Management Summit held at the Union League Club. The panel discussion topic is "Selecting and Surveying your Data Architect Options", where Bob will highlight the problem with the way information is typically delivered to end users, and will provide examples of how Data Agent's architecture can solve this business problem for portfolio managers, analysts and other business users at small to very large investment management firms and hedge funds.

About Data Agent iiSuite^(SM)

Data Agent's iiSuite of investment intelligence (ii) solutions offers highly targeted business intelligence capabilities tailored for the unique needs of hedge fund and investment management business users. Data Agent's iiSuite consists of:

- iiMart^(SM), a comprehensive, front office oriented investment data store.
- iiCube^(SM), user friendly and flexible analysis.
- iiBond^(SM), integrated, sophisticated bond and derivatives analytics.
- iiPortal^(SM), dashboard integration anywhere.

Data Agent's iiMart allows firms to consolidate information --such as holdings and transactions from multiple internal systems, prime brokers or custodians-- combine research from external and internal sources and calculate analytics and statistics on any asset class including complex derivatives. With Data Agent's iiCube, business users can create multi-dimensional views including any asset class, any classification, over any time period, and integrated with statistical and investment analysis engines.
